PROFILE

Unity developer with 5 years of shipped mobile game experience. Three years building core gameplay systems and mechanics for hyper-casual and casual titles on fast prototype cycles, followed by two years of SDK and platform engineering across a live game portfolio. I build features end to end — mechanics, systems and the UI, animation and VFX layer that makes them feel good to play — and I've shipped across the full path, from prototype to native builds and store release.

SKILLS

Unity · C# · Gameplay Programming · Game Architecture · Prototyping · Performance Optimization
UI (UGUI) · Animation & Tweening (DOTween) · VFX & Particle Systems · Shaders (Shader Graph, HLSL)
· Git

Native Android/iOS · SDK Integration · Analytics & LiveOps · Java · Objective-C

WORK EXPERIENCE

UNITY SDK DEVELOPER - UDO GAMES

September 2024 – Present

Build and maintain Hammer, an in-house cross-platform Unity SDK powering ad mediation, attribution, analytics, privacy, IAP and performance telemetry across the studio's portfolio. Work daily inside live game codebases, handling integration, native Android/iOS builds and store releases on Google Play, App Store and Xiaomi GetApps.

GAME DEVELOPER - Milgame Studio

December 2023 - September 2024

Developed and maintained live mobile titles including Sniper Destiny: Lone Wolf. Built new gameplay features and meta systems for LiveOps content updates, and refined existing systems based on retention and engagement data. Handled UI flow, animation timing and visual polish for each release. As the most experienced developer on the team, ran daily standups, distributed and reviewed work for junior developers, and represented the team in publisher meetings.

GAME DEVELOPER - Gigantic Games

October 2022 - June 2023

Built and shipped hyper-casual titles on 1–2 week cycles, delivering 15+ games in 9 months from concept to store release. Implemented core mechanics and gameplay systems, then iterated on feel — UI transitions, animation timing, particle effects and shader work — based on CPI and playtest results.

GAME DEVELOPER - UDO GAMES

September 2021 - August 2022

Shipped hyper-casual titles from prototype to store on rapid iteration cycles. Implemented core mechanics, UI systems and gameplay polish. Optimized runtime performance for low-end Android devices.

INTERN - UDO GAMES

June 2021 - August 2021

Hands-on training in Unity development, art and design; contributed to hyper-casual prototypes.

EDUCATION

MANISA CELAL BAYAR UNIVERSITY - COMPUTER ENGINEERING (BACHELOR'S DEGREE)
2017 - 2022

VOLUNTEER WORK

MENTOR - ANKU GAME JAM

2024

Mentored participants at ANKU Game Jam, providing support and guidance for their questions and issues during the competition.

ASSISTANT INSTRUCTOR - PATIKA.DEV

2021

Trained 60 developers and artists in a program run with Google, Kodluyoruz and Patika, simulating a real game studio over 3 months.

ACHIEVEMENTS

WINNER - UDO Next Jam #1 2021

TRINITY

Achieved first place in UDO Next Jam #1 by developing a game with my teammates in 3 days.
